New Delhi, India

SUMMARY

Equipped with 4+ years' experience in healthcare data operations and predictive analytics, with expertise in Excel, Power BI, SQL, and statistical modeling. Ability to turn complex datasets into actionable insights and support decision-making for optimization.

EDUCATION

Hindu College, University of Delhi — New Delhi, India
Master of Operational Research (MOR); CGPA: 7 — **June 2023 – May 2025**
Relevant Coursework: Statistics & Econometrics Modeling, Financial Analytics, Inventory Management

Indira Gandi National Open University (IGNOU) — New Delhi, India
Bachelor of Computer Application (BCA); CGPA: 7.2 — **June 2020 – May 2023**

SKILLS & ABILITIES

- **Languages/Libraries:** Python (Pandas, NumPy, Seaborn, Scikit-Learn, Matplotlib), SQL, VBA
- **Tools/Software:** Excel Advanced, Power BI, Tableau, MS-Office, MySQL, GitHub, Canva
- **Soft Skills:** Communication, Problem-solving, Critical Thinking, Leadership, Public Speaking

WORK EXPERIENCE

Research Team Lead – Data Operations | Max Healthcare | Saket, New Delhi | September 2019 – September 2023

- Collected, cleaned, and validated large-scale surveillance data using **Excel**, ensuring high data integrity through rigorous **QA/QC** and governance protocols.
- Generated and presented monthly **Power BI** and Excel-based data quality and performance dashboards to central teams and funding stakeholders, enabling data-driven decision-making.
- Developed **standardized Excel workflows** and reporting templates, improving data consistency and **reporting efficiency by 10%**
- Streamlined field operations by troubleshooting data-related and logistical challenges, contributing to a **5% cost reduction**.
- Managed secure data transfers to cloud servers and ensured timely data availability for analysis and reporting

PROJECTS

Retail Demand Forecasting for Inventory Optimization — Project Link

- Built and evaluated demand forecasting models (Linear Regression, Random Forest, ARIMA) achieving up to **90% Accuracy**, improving **6-month** stock planning accuracy with reorder level.
- Conducted EDA on dataset identified key demand patterns using seasonality, promotions, weather, and discount trends.
- Performed **ABC** inventory analysis on 100 products across 5 categories identifying A-class items have **71.5%** of total sales.

Credit Risk Assessment & Default Prediction — Project Link

- Developed a machine learning model using Random Forest with **92% accuracy** and **0.93 ROC-AUC** to predict loan defaults, outperforming Logistic Regression.
- Performed EDA on 32K loan records, uncovering high default risk among renters with elevated loan-to-income **(correlation: 0.38)** and interest rates **(0.34)**; insights validated using logistic regression coefficients and charts.
- Resolved 22% class imbalance using **RandomOverSampler**, boosting defaulter recall by **+42% (LogReg: 46%→84%)** and **+23% (RF: 68%→91%)**; applied median imputation for missing values to ensure model reliability.

Sales Report Dashboard — Project Link

- Developed interactive Power BI dashboards with visualizations showcasing daily/monthly order **trends**, Sales by category/size, and **top 5 / bottom 5** performing pizzas, validated with **SQL Queries.**
- Identified the top 5 best-selling pizzas, contributing to **$20M** in sales, and achieved **13.2%** month-over-month sales.
- Performed ETL and EDA using **DAX Queries** and built KPIs to provide end-to-end business intelligence solutions.

CERTIFICATES

Introduction to Data Science – Cisco (Issued : 2025) | Certificate
Data Analytics Essentials – Cisco (Issued : 2025) | Certificate
Python Basic – HackerRank (Issued : 2024) | Certificate
